

Executive Summary

This report documents three production incidents affecting Neura AI platform services during Q1 2026. Total customer-impacting downtime was 47 minutes across incidents INC-2026-0142 (API latency degradation), INC-2026-0187 (authentication service outage), and INC-2026-0211 (batch pipeline delay). Mean time to detect (MTTD) averaged 8.2 minutes; mean time to resolve (MTTR) averaged 22 minutes. No data loss occurred. Engineering_IT has implemented four preventative controls and updated the on-call runbook referenced in Operations Standard Operating Procedures.

Incident Summary Table

Incident ID	Severity	Duration	Customers Affected	Root Cause
INC-2026-0142	SEV-2	18 min	340	Connection pool exhaustion
INC-2026-0187	SEV-1	12 min	890	Bad config deployment
INC-2026-0211	SEV-3	17 min	120	Upstream vendor API timeout

Remediation Actions Completed

- Increased API gateway connection pool limits from 200 to 500 (Engineering_IT)
- Added canary deployment gate requiring 5-minute soak test (Engineering_IT)
- Implemented circuit breaker for vendor integration Neura Connect (Engineering_IT)
- Updated incident communication templates per Operations Compliance Framework

Example Scenario: SEV-1 Authentication Outage (INC-2026-0187)

On March 12, 2026 at 09:14 PST, the authentication microservice began returning HTTP 503 errors after a configuration change removed a required TLS certificate reference. PagerDuty alert fired at 09:17. On-call engineer James Okonkwo's team rolled back the deployment within 9 minutes. Customer Success notified 890 affected enterprise accounts per the Executive crisis communication protocol. Post-incident review assigned action items to Finance (vendor SLA credit verification) and Human_Resources (on-call compensation review).

Definitions

- SEV-1: Critical incident with complete service unavailability or data integrity risk.
- MTTR: Mean Time to Resolve: elapsed time from detection to service restoration.
- PIR: Post-Incident Review: structured analysis conducted within 5 business days.

War Room: Cross-functional bridge for SEV-1 incidents including Engineering, Operations, and Executive.

Approval Workflow

- Incident Commander documents timeline within 24 hours
- Engineering Manager reviews and signs off within 48 hours
- CTO approves final PIR and action item owners
- Operations receives copy for Compliance Framework audit trail

Metrics and Targets

Q1 2026 incident metrics: 3 open incidents at quarter end, 99.97% platform uptime (target 99.95%), 0 security breaches. Q2 targets: MTTD under 5 minutes, MTTR under 15 minutes for SEV-1, 100% PIR completion within SLA.

Appendix 1: Supplementary Reference Material

This appendix provides additional context for Neura AI enterprise operations.

Governance and Review:

- Document reviewed quarterly by department leadership
- Next scheduled review: Q3 2026
- Compliance alignment verified against Operations/Compliance Framework.pdf

Related Metrics Snapshot:

- Total employees: 847
- FY2025 revenue: \$142.3M ARR
- FY2026 forecast: \$198.7M
- Customer count: 1240
- Platform NPS: 62

Department Coordination Notes:

- Engineering_IT: Technical implementation and security controls
- Finance: Budget allocation, expense approval, and financial reporting
- Human_Resources: Policy compliance, training, and employee communications
- Marketing: External communications and brand consistency

- Operations: Process governance, compliance, and vendor management
- Executive: Strategic alignment and board reporting

Document Control:

- Master copy maintained in corporate document management system
- Previous versions archived for 7 years per retention policy
- Unauthorized distribution of Confidential or Restricted documents is prohibited
